

Do you feel like you've been on a mountain?

What is your buzzword of today?

What are overarching topics and challenges?

citizen science

How to move forward from plan to action

communication

Engagement and mutual understanding of people with various backgrounds

Including creativity

Engaging people on an eye-to-eye level.

communication

ways to communicate science

Involving diverse participants

What are overarching topics and challenges?

Dream big, apply deliberately

Creativity

Engagement

engagement of stakeholders

Artistic practices

Communication Skills
Feasibility

Creativity

Out-of-the-box

Interactive harmony

What are overarching topics and challenges?

co-creation participation

Participatory art

Different ways of interaction for different populations.

What are the differences between art and science?

Move past the dualism of art and science.

time management different stakeholders, different motivations simplicity in science communication

Science can come from different actors so open communication is a must

fun

Research as art

What are overarching topics and challenges?

Citizen Science || Science vs
Citizens vs Science

Different perspectives

Put yourself in someone's
shoes

co-creation

Possibly how other methods
(i.e. arts, comm.) can maximize
the impact of citizen science

communication

implicit-explicit

Challenging status quo of
existing power relationships

Lunch break

What are overarching topics and challenges?

Challenge yourself!

Arts practices

Citizen Science is hip but not new, exploit that

Go beyond discovery to justification

I should so more improv :-)

Collective intelligence & creativity

Today's take-aways & learnings

Communication and development of communication skills as continuous processes

Art is a way to reduce bias

Make Science Accessible and Fun!

"citizen science skills" can be trained and learned

Be open-minded

Artistic methods can help to communicate research findings

It feels like Friday ;)

Walk a mile in the shoes of each involved stakeholder (Eminem, 2020)

You are good enough

Today's take-aways & learnings

Integrity

Good ideas don't necessarily have to cost a lot of resources to implement.

Clarity

Facilitation - how to mediate between people and reach consensus

Involving the stakeholders might make your life more complicated, but your project will become better

One needs to be emphatic before pointing fingers

Everyone is an artist!

Art is a more direct way to connect with the people

Be creative to obtain different perspectives

Today's take-aways & learnings

taking the perspectives of others

Commitment

Ideas on how yo apply knowledge from today's workshop on own project

Environmentally sustainable artistic practices can support collaboration among a community.

Artistic methods can always support collaboration & engagement. Artistic methods can really help seeing a topic/issue/challenge from a different perspective which is so valuable. Also, never forget to play & have fun!

1.Ideas and inspiration 2.many aspects

Art practices can involve a (more) diverse range of participants

Arts, communication, and science will benefit themselves if they are seen as allies rather than different sides of a coin.

Stay open

Today's take-aways & learnings

Being open is the key of productive dialogue

Be simple to address to appropriate actors

It feels like Saturday ;)

Integrating all the actors' motivations and interests, make the project beneficial for everyone

A foundation for good collaboration is knowing what motivates your collaborators.

Think from different perspectives how to address people

I should do more improv :-)

Collective intelligence and creativity are interrelated

... or maybe Sunday? ^^

Today's take-aways & learnings

Needs to be more than 'nice to have', should have a meaningful impact

I'm just happy it isn't Monday

Stop. Hammer time!

Write a tweet (144 characters) about today's key learnings using #cswinterschool

#CitizenScience love at the #cswinterschool. Thank you all for being wonderful!

Creating spaces and adequate environments allow for great outcomes. Big thanks to the organisers #cswinterschool Susanne Hecker

Great organisation! Learning opportunity for many different aspects of Citizen Science in Zurich! #cswinterschool beliz budak i seem to not able to log on to my institute twitter, so here we go :)

Don't be like Hans!;) Be open-minded and accept other ideas and perspectives. It can enrich your research design. (Maria)
